

Admission Process Guide

Hospital Knowledge Base Assistant — Reference Document

Purpose

This guide explains the standard hospital admission workflow for patients who require inpatient care.

Registration

Collect patient identification, contact details, emergency contact information, and referral information. Verify demographic information before creating the admission record.

Initial Assessment

The admitting clinical team reviews the reason for admission, current symptoms, relevant medical history, allergies, medications, and immediate care needs.

Bed Assignment

After clinical assessment and administrative clearance, an appropriate inpatient unit and bed are assigned based on clinical needs and availability.

Patient Orientation

Explain ward routines, visiting arrangements, call-bell use, safety procedures, and how patients can request assistance.

Note: This is a synthetic knowledge-base document created for application development, RAG testing, demonstrations, and training. It is not a substitute for clinical judgment, hospital policy, or professional medical advice.
