

Patient Discharge Process

Hospital Knowledge Base Assistant — Reference Document

Discharge Planning

Discharge planning should begin early and include the clinical team, patient, and caregiver when appropriate.

Instructions

Provide medication instructions, follow-up arrangements, warning signs, activity guidance, and any required home-care instructions.

Medication Reconciliation

Review medications at discharge and clarify changes from the patient's pre-admission medication list.

Transportation

Confirm that the patient has an appropriate transportation and support plan when required.
