

Patient Registration & Identification

Hospital Knowledge Base Assistant — Reference Document

Registration Information

Patient records should contain accurate identifying information and current contact details.

Identity Verification

Use the hospital's approved identifiers to confirm identity before registration, admission, treatment, specimen collection, or transfer.

Emergency Registration

In emergencies, essential care should not be delayed because complete registration information is unavailable. Complete missing administrative information as soon as practical.

Record Accuracy

Correct errors through the hospital's approved record-correction process. Avoid duplicate patient records whenever possible.

Note: This is a synthetic knowledge-base document created for application development, RAG testing, demonstrations, and training. It is not a substitute for clinical judgment, hospital policy, or professional medical advice.
