

Laboratory Services Guide

Hospital Knowledge Base Assistant — Reference Document

Specimen Collection

Collect specimens using approved containers, patient identification procedures, and department-specific collection instructions.

Labeling

Specimens should be labeled with the required patient identifiers and collection information before transport.

Testing

Laboratory tests should be requested using the hospital's approved ordering process.

Results

Critical or urgent results should be communicated according to laboratory and clinical escalation procedures.

Note: This is a synthetic knowledge-base document created for application development, RAG testing, demonstrations, and training. It is not a substitute for clinical judgment, hospital policy, or professional medical advice.
