

Radiology Services Guide

Hospital Knowledge Base Assistant — Reference Document

Common Services

Radiology may include X-ray, ultrasound, CT, MRI, and other diagnostic imaging services depending on hospital capabilities.

Preparation

Preparation requirements vary by examination. Staff should follow the approved protocol for each study.

Safety Screening

Before imaging, verify relevant contraindications, allergies, implants, pregnancy status when applicable, and other required safety information.

Results

Imaging findings are interpreted by authorized clinicians and communicated through the hospital's approved reporting system.
