

Safety Incident Reporting

Hospital Knowledge Base Assistant — Reference Document

Purpose

Incident reporting supports learning, risk reduction, and improvement of patient safety processes.

What to Report

Report adverse events, near misses, medication errors, equipment problems, falls, and other safety concerns according to local policy.

Timeliness

Report incidents promptly and provide objective factual information.

Confidentiality

Handle incident information according to applicable privacy, confidentiality, and hospital requirements.

Note: This is a synthetic knowledge-base document created for application development, RAG testing, demonstrations, and training. It is not a substitute for clinical judgment, hospital policy, or professional medical advice.
